DETAILED ACTION

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

Knutson et al (US Patent 6,788,710) teach a VSB transmission system comprising a supplemental data processor that includes a supplemental data, encoding, inserting an auxiliary packet, inserting a null packet, and inserting an MPEG header and the multiplexer that multiplexes the supplemental data and the MPEG data. Kumar (US 5,966,401) teaches a data randomizer, an encoder, and an interleaver. Combes et al (US 6,704,366) teach an encoder, an interleaver, and a convolutional encoder in the transmitting section. The prior art of record fails to teach a data decoding part processing the data processed in said supplemental data symbol processor including symbol-byte converting, data de-interleaving, and eliminating said parity added in the data encoding part before the VSB transmitter processing.
